

ValveTruth

Learn from yesterday,
choose for tomorrow

Einstein once said, “doing the same thing over and over again and expecting a new result is the definition of insanity.” So why are you expecting a new result with that same old reciprocating valve? Drop in a new **Camflex GR** and make your life so much better. It’s a one-for-one direct replacement with less spare parts, high reliability, less leak paths and half the size. When you really think about it, there is no decision to make except a **Camflex GR**. Make your life easier and replace your reciprocating valve with a **Camflex GR**.

Camflex GR – out performs the competition!

| Size | Material | End Flange | Class |
|------|----------|-----------------|-------------|
| 1" | CS, SS | ASME RF Flanged | 150/300/600 |
| 1.5" | CS, SS | ASME RF Flanged | 150/300/600 |
| 2" | CS, SS | ASME RF Flanged | 150/300/600 |
| 3" | CS, SS | ASME RF Flanged | 150/300/600 |
| 4" | CS, SS | ASME RF Flanged | 150/300/600 |
| 6" | CS, SS | ASME RF Flanged | 150/300/600 |

Camflex GR effectively combines enhanced control performance, simplicity and long-term reliability for a wide range of applications.

What our customers are saying “from a performance and ease of maintenance point of view, Camflex is still the referenced valve in the market!”
