

ValveTruth

Cost cutting does not need to be unpleasant

Cutting costs is never an easy thing, except when you think about valve replacement. **So the next time you need to replace a reciprocating valve, think Camflex GR.** The Camflex GR is typically 20-80% less expensive than a reciprocating valve. And that does not even factor in the savings of spare parts inventory that you will not need to carry. When you really think about it, there is no decision to make except a Camflex GR. Save yourself some money and look good doing it! **Choose Camflex GR.**

Comparison Camflex GR vs. Reciprocating valve					
	1"	2"	3"	4"	6"
Camflex GR	100%	100%	100%	100%	100%
Competitor I	120%	120%	140%	140%	150%
Competitor II	200%	225%	225%	230%	250%

9 out of 10 standard applications will fall within this range
