Pilot Operated PRV benefits without the extra cost & hassle when replacing API 526 PRVs

Don’t let the cost & hassle of piping modification keep you from installing the right valve for the right application. Take advantage of Pilot Operated Pressure Relief Valve (PRV) benefits without modifying your existing piping by upgrading your Direct Spring API 526 valve to the Consolidated* 2900 Pilot Valve.

THE CHALLENGE
Pilot Operated Pressure Relief Valves can solve some of the most challenging PRV applications where High Inlet Line Loss is causing Valve Chatter, High Operating Pressure is required, and much more.

However, Piping Modification and Installation Challenges due to dimensional differences when replacing your API 526 PRV with a Pilot Operated PRV can quickly Eat Away Your ROI.

THE SOLUTION
The Consolidated 2900 is the Only Pilot Valve Solution in the Market able to replace any manufacturer’s API 526 Direct Spring PRV Without Piping Modification caused by center-to-face dimensional differences.

In addition, you can easily Upgrade Your Consolidated 1900 Series to a 2900 pilot valve with a simple “off-the-shelf” 2900 conversion kit. It’s fast, it’s easy, and it Saves You Money both in installation and operating costs.
