

Mooney* 4" Flowgrid* Slam Shut

Flanged CL 150, 300

The 4" Mooney Slam Shut is a unique pneumatically actuated device that automatically provides downstream pressure protection. By separating the pneumatic controller and mechanical latching mechanism, shutoff is guaranteed to occur only when designated set points are reached. The patent pending design prevents disruptive and costly "accidental shutoffs". Positive shutoff is achieved instantly through the snap acting mechanism, and reset can be completed with common tools.

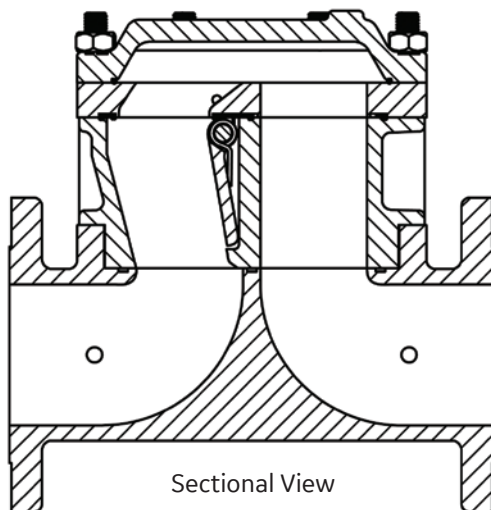

Flowgrid Regulator with Integral Shutoff Valve, Series 50D Dual Function Controller.
